

AMERDESH J NAIR

Engineering Graduate – Computer

PROFESSIONAL SUMMARY

Computer Science graduate with hands-on experience in Python-based AI/ML projects, computer vision, NLP, web scraping and Java application development. Currently pursuing Data Science training at PySpiders covering Python (basic to advanced), SQL, Power BI, statistics, Big Data, NumPy, Pandas, data analysis, data visualization and machine learning. Published research on CNN-based lung cancer detection. Seeking opportunities in Data Analytics, Python/Software Development, AI/ML and technology-driven roles.

INTERESTS

- AI & Autonomy
- Defense Technology
- Geopolitics
- Fitness & Discipline

EDUCATION

B.Tech – Computer Science & Engineering

Mangalam College of Engineering, Kottayam

Year: 2020–2024

Course Highlights: AI & ML, DBMS, Computer Networks, Operating Systems

Senior Secondary – Computer Science Stream

St John's School, Pathanamthitta

Year: 2018–2020

Secondary Schooling

Amrita Vidyalayam, Pathanamthitta

SKILLS

Technical Skills

Programming & Scripting

Python, HTML/CSS, Java, C

Data & Analytics

SQL/MySQL, Pandas, NumPy, Data Analysis, Data Visualization, Statistics, Power BI

AI / ML

Machine Learning, Neural Networks, CNN, TensorFlow/Keras, OpenCV, NLP, Image Processing, Model Training & Evaluation

Tools & Platforms

Git, GitHub, Linux, VS Code

Computer Science Concepts

Object-Oriented Programming, DBMS, Operating Systems, Computer Networks

Soft Skills

Leadership, Communication, Teamwork, Adaptability, Analytical Thinking, Problem Solving

TRAINING & INDUSTRY PROJECT EXPERIENCE

• B-76 Technologies Pvt. Ltd.- Internal Industry Project (Ongoing)

Region-Aware Trend Ingestion & Structuring System

• Data Science and Gen AI (Ongoing) (Python (Basic to Advanced), SQL, Power BI, Statistics, Big Data, Data Analysis & Visualization using NumPy and Pandas, and Machine Learning.)

• Fundamentals of Wireless Communication & Industry 4.0 (15 days)

Torc Infotech Pvt. Ltd., Kochi

PROJECT

Lung Cancer Detection using CNN (Research Project)

- Developed a hybrid model combining **AlexNet + VGG16** CNN architectures for accurate lung cancer prediction using CT scan images.
- Achieved a classification accuracy of **96%**, including detection of cancer **type and stage**.
- Performed dataset processing, feature extraction, and training using **Python** and deep learning frameworks.
- Contributed to a research paper documenting methodology and performance evaluation.

Technologies: Python, CNN, TensorFlow/Keras, Image Processing

A.I.A – Artificial Intelligence Assistant

- Designed an assistive AI tool to help differently abled users perform daily tasks via **voice and gesture inputs**.
- Implemented NLP-based command recognition and task execution functionalities for accessibility support.
- Focused on user interaction for individuals with **mobility or speaking limitations**.

Technologies: Python, NLP Concepts, Speech Recognition Libraries

News & Web Article Summarizer

- Created a text summarization application that retrieves online news using **web scraping** and converts it into concise summaries.
- Built a simple user interface using **Tkinter** for easy input and real-time summary generation.
- Utilized extractive summarization techniques and URL-based content extraction.

Technologies: Python, Tkinter, BeautifulSoup/Scrapy (web scraping), NLP basics

Secure Digital Voting System

- Developed a voting platform that supports **flexible election categories** (college, community, state-level use cases).
- Implemented user authentication and secure vote recording features in **Java GUI**.
- Enabled confidential input, user-friendly interaction, and expandable candidate options.

Technologies: Java, File Handling / Database concepts, GUI Design

CERTIFICATIONS

- Data Science and Gen AI (On Going)
- Autonomous Aerospace Systems (Coursera + Kerala Knowledge Economy Mission)
- Diploma in Java – Livewire Academy
- Google Cloud – Introduction to Generative AI
- Young Innovators Programme – KDISC
- EnglishScore CEFR C1 – Core Skills (British Council)
- EnglishScore CEFR B2 – Speaking (British Council)
- TechFest – Tathva (NIT Calicut)
- IEEE Event Participation

LEADERSHIP & ACHIEVEMENTS

- Research Paper Published: Lung Cancer Detection using CNN (AIP Publishing)
- Vice Captain – ArtsFest College TechFest
- Project Head – Major & Minor Projects
- Active IEEE Member & Event Contributor
